PHASE 03 · WEEKS 4-8

GATED

Prove Readiness

The calendar creates urgency. Evidence — community, testing, and security — authorizes launch.

- Reach at least 1,000 real community members.
- Demonstrate genuine conversation, participation, and member retention.
- Test \$HODLERS, fee processing, the Buy Router, permanent liquidity, staking vaults, and NFT farming.
- Complete security review and resolve every critical or high-severity finding.
- Prepare the dashboard, verified contract pages, official links, scam warnings, and launch guides.
- Rehearse the complete launch sequence and the first 72 hours of monitoring.

MILESTONE

1,000 real members plus a tested, transparent, launch-ready protocol.

PHASE 04 · OCT-NOV 2026

GATED

04

Genesis Launch

Launch begins only after every readiness condition is met and publicly verifiable.

- Publish verified \$HODLERS contracts through official channels.
- Establish disclosed PancakeSwap V2 liquidity and permanently remove its LP tokens from team control.
- Remove token mint authority after all genesis destinations are verified.
- Open the Genesis NFT mint: 30-minute whitelist window, then public access.
- Activate the Buy Router, three staking vaults, NFT Farming Vault, fee processor, burns, and dashboard.
- Provide human support and active monitoring throughout launch and the first 72 hours.

MILESTONE

A verifiable community launch with fixed economic rules and observable balances.

PHASE 05 · POST-LAUNCH

UPCOMING

The First 90 Days

Launch is the start of the story. Consistency afterward is what earns durable trust.

- Publish dashboard-based updates about vaults, burns, liquidity, rewards, and NFT farming.
- Continue improving the Android game as a lightweight community activity.
- Organize holder challenges, memes, artwork, educational sessions, and member spotlights.
- Help the Genesis Ambassador Circle welcome newcomers and strengthen the culture.
- Improve documentation and user experience using real community feedback.
- Evaluate new integrations only after compatibility and security testing.

MILESTONE

Consistent participation and visible product progress beyond launch day.

Zero shortcuts.

The project will not lower the community threshold, buy members, manufacture engagement, or rush unfinished contracts to preserve a date.
